

MUHAMMED FARIZ KP

Web Designer

Highly motivated and results-driven B.Tech student with a strong passion about creating visually appealing and user-friendly websites that enhance the user experience, my interest in the internet and digital platforms led me to create a personal website while learning more about web design and its industry. To become a professional web designer, one approach is to pursue further studies at a university with a web design program, in addition to upgrading knowledge and skills through short courses on web design and software.
